For New Construction • Low Profile for Shallow Wall Cavities

Our new **FA101LP** single-gang, low profile IN/OUT™ BOX is designed for new work installations with shallower wall cavities. **It's a little shorter than our 'regular' single-gang IN/OUT outlet box – just right for smaller spaces.**

IN/OUT BOX is adjustable for wall thicknesses up to 1-1/2" – perfect for use when the final wall thickness is unknown; double drywall, change orders; tile, mirrors, etc.

- No more set back boxes – IN/OUT BOX depth adjusts before OR after the wall finish is done
- Depth adjustment screw is accessible even after the wall finish is in place
- Complies with 2011 NEC, 314.20 for set back boxes
- Secure installation – Mounts to wood or steel studs in new construction
- cULus Listed

Catalog Number	UPC/DEI/NAED Mfg. #018997	Description IN/OUT BOX™	Size/ Cu Inches	Unit/Std Pkg
FA101LP	76880	Shorter, Non-metallic outlet box	Single-gang 18.3 cu in	25
