## **Arlington Celebrates 75 years in Business in 2024**

Scranton, PA... Thank you to everyone who contributed to our growth and success!

Founded in 1949, Arlington first served the electrical industry as a regional supplier of zinc die cast fittings.

Over the past 75 years, Arlington has become a leading manufacturer of MADE IN USA traditional metallic and non-metallic fittings and connectors – *and unique and innovative electrical and communications products.*

We have introduced hundreds of new products that solve job site problems and save time. And currently have more than 350 patents and patents pending in North America.
