SNAP-TITE® Transition Fittings

Allow Cable, Conduit Installation in Tight Spaces

Arlington's **SNAP-TITE® Transition Fittings** offer the time-saving solution for installing *additional* conduit or cable in an already congested panel.

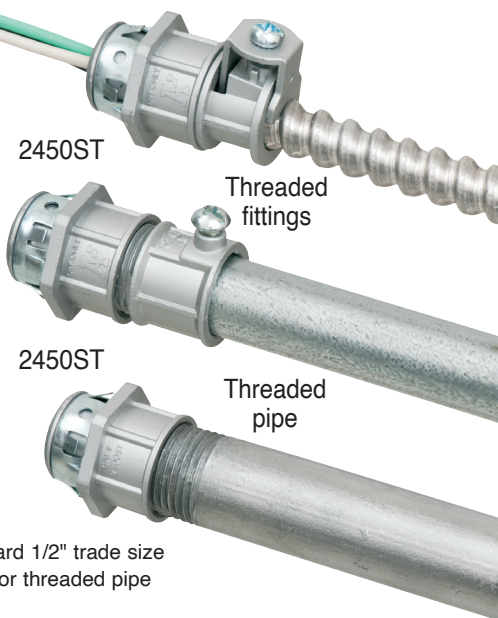

Adaptable 2450ST series transition fittings allow installers to work around tightly spaced, *installed* fittings in a panel, box or enclosure – where installing *and tightening* additional locknut fittings would be difficult.

Convenient, Time-Saving

2450ST snaps into a 1/2" knockout and connects standard 1/2" trade size threaded fittings or threaded pipe.

New sizes fit 3/4" and 1" knockouts and 3/4" and 1" trade size threaded pipe and threaded hub.

- Use in Dry Locations Only
- cETLus Listed

Arlington manufactures a variety of time-saving **SNAP-TITE®** and **SNAP2IT®** connectors. They offer easy, secure, snap in installation. *No Tools! And fit the widest range of MC cable.*
