

Galvanized Steel Cable Support

Easy installation • Economical • Holds MC or NM Cable on stud

Holds up to FOUR MC or SIX NM cables - centered on a 2x4!

For use with MC, AC, and Flexible Metal Conduit – and non-metallic sheathed cable (NM cable), Arlington’s economical CUS6 galvanized steel Cable Support holds cable secure and centered on a metal or wood stud.

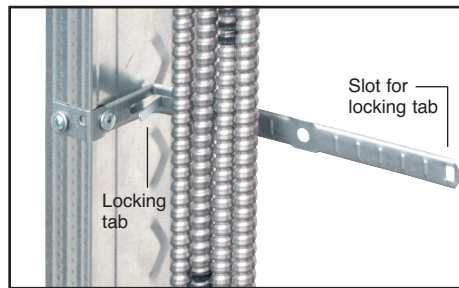

It’s perfect for fastening and positioning up to four individual MC cables, or six NM cables on a 2x4.

Installation is quick and easy. Nail or screw CUS6 to a wood or metal stud, and position the cables. Next bend the strap at the foldline (centerline) Fold the strap over the cables and insert the locking tab to hold them securely in place.

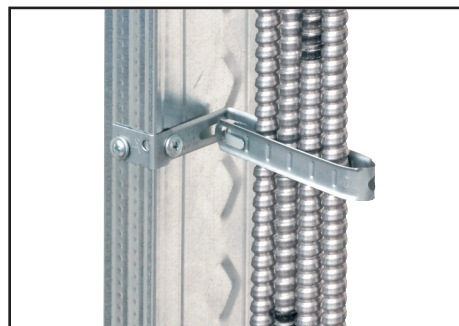

- Complies with 2020 NEC, article 300.4(D)

1 Nail or screw CUS6 support to metal or wood stud (metal shown).

3 Bend support on foldline (centerline). Insert locking tab into slot.

4 Bend tab over support to lock cable securely in place. CUS6 holds up to FOUR MC cables – or SIX NM Cables centered on a 2x4.

For Wood or Metal 2x4s
