

# Vapor Barrier Cover for Exterior Fixture Boxes

*Keeps water from entering around outside of installed box*

**FR410F**  
Vapor Barrier Cover  
for exterior fixtures

Includes adapter ring  
for a deeper octagon box

...and an adapter ring  
for a pan box

Designed for exterior fixture boxes, Arlington's vapor barrier cover prevents water and air from entering around a box installed on exterior sheathing, **without the need for caulking – or a gasket.** *It saves time and money.*

Easy to install, the flashing mounts over the installed box. FR410F comes with two rings for use on a pan box *or* a deeper octagon box.

***No gasket needed.***  
***No caulking required.***

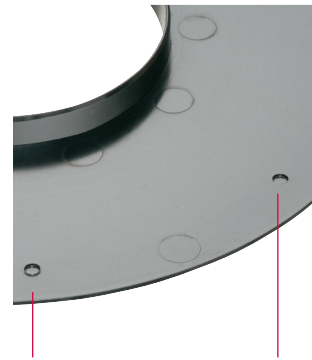

### Easy to install

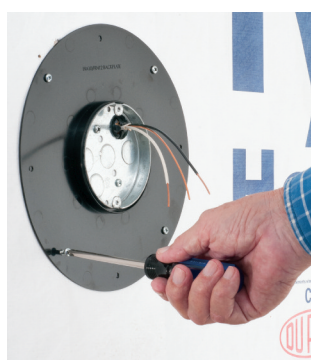

Mount box to sheathing after the installation of weather barrier.

Place flashing backing over box.

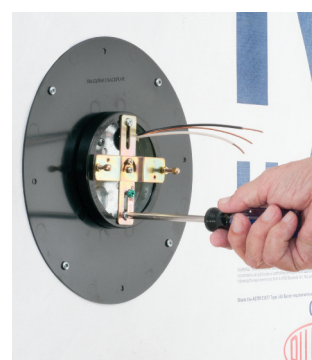

Holes in flange ship flashed-over

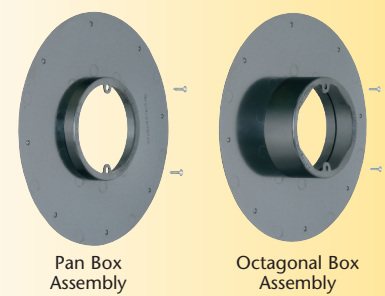

Attach flashing backing to sheathing through flashed-over holes.

Using two supplied #8 screws, attach appropriate ring to installed box. *FR410F comes with two rings; one for a pan box, the other for an octagonal box.*

Install fixture mounting hardware per fixture manufacturer's instructions.
