Recessed Power/Low Voltage TV Box™

nore on

For Flush-to-the-Wall Mounting of Flat Screen TVs

Two-Gang Power/Low Voltage Box for New Work or Retrofit

Arlington's recessed TVBU505GC non-metallic combination power and low voltage TV BOX™ is the secure, easy way to mount a flat screen TV flush against a wall. It features power in *one side*; low voltage in *the other* for Class 2 wiring of satellite or cable TV, speakers and more.

The job looks great! Plugs and connectors stay inside this two-gang box, without extending past the wall.

- Non-metallic box with paintable white trim plate
- Easy to install, secure installation in walls up to 1-1/2" thick
- Mounting wings hold box securely against the wall in retrofit projects
- Boxes screw-mount to stud in new construction
- Optional covers available for unused boxes
- Accommodates Arlington's SCOOP™ series entrance plates and hoods
- Other styles available:
 - Steel boxes with plastic trim plate
- Non-metallic boxes with ground clip for use in Canada
- cULus Listed

Recessed Plastic TV Box™

Power/Low Voltage Combination Box

RETROFIT - Two-gang TVBU505GC shown

1 Use enclosure (without trim plate) as a template for opening. Cut hole.

2 Cut drywall. Attach trim plate to box. Pull wire/cables. Install box assembly in opening.

3 Tighten mounting wing screws to pull the box securely against the wall.

NEW CONSTRUCTION - Three-gang TVBU507GC shown

1 Attach box to stud using #6 screws. Use tabs on box for proper positioning of box depth.

3 Attach paintable trim plate with screws provided. See below, left for reference.

4 OPTION for new work: Tighten mounting wing screws to pull the box securely against the wall.

Positioning tabs

2 Positioning tabs are set for 1/2" and 5/8" drywall.
